

Contract Safety Director

SRI has developed and proven a unique service titled "Contract Safety Director", or CSD. This service does what no other compliance related consulting service can do: It provides your corporation with a "Staff" or "Safety

Department" of professionals with particular expertise in different

loss control and risk management disciplines.

Through a coordinative team effort that focuses on the unique expertise of each safety professional within our firm, we can provide complete, thorough, and cost effective safety services. Our scope of services provided to you can be broad, or very specific.

Our 8 Step CSD process BEGINS like this:

Step 1: Initial needs assessment/gap analysis to determine where you are and what your safety goals are.

Step 2: Determine CSD process by identifying roles and responsibilities.

Step 3: Review current written program & update policies, procedures. New programs and policies will be established where none currently exist.

Ensure all employees, supervisors, and managers have required training and it is up to date with regulatory and industry standards.

Key Benefits of CSD:

- Immediate emergency response services
- Safety services are bundled into one service contract
- Payment is a fixed monthly fee over 12 months
- Fee for services stay within your budget elimination additional costs
- Services available in multiple locations

Step 5:

Work with supervisors and front line employees to determine which safety processes are working, and which need further attention.

Step 7:

Review all components and determine steps towards ongoing commitment and maintenance.

Step 6:

Perform field audits and complete a report of findings.

Step 8:

Trend and track program effectiveness through safety statistics, performance metrics, and supervisor/employee feedback

Ongoing Commitment and Maintenance Includes:

Regular Jobsite safety audits - Direct Integration with your Workforce - Ongoing Training efforts with all members of staff - Program Development and SOPs - Accident/Incident Investigations as needed - Jobsite prequalification - Site Specific Safety Plans as Required - Development and Maintenance of Company Safety Handbook.
